

Selective Filter B2T

P/N 6809198

- Compatible Sensors:** Draeger-Sensor® Odorant (XS): P/N 6809200 (filter is standard)
 Draeger-Sensor® NO (XS): P/N 6809125 (filter is optional)
- Filter Duration:** Selective Filter B2T has a typical service life of 40 ppm-hours. Operation in high humidity or in cold environments may reduce efficiency and/or longevity of the filter.
- Filter Capacity:** The following table lists the tested gases / vapors and the challenge concentration used for filter testing purposes. Exposures to concentrations above the following challenge concentrations may cause break-through and result in a cross-sensitivity response. The following tests were conducted on new filter material.

<u>Chemical</u>	<u>Challenge Concentration</u>	<u>Odorant Sensor Indication</u>
Hydrogen Sulfide	10 ppm	< 1 ppm
Sulfur Dioxide	15 ppm	< 1 ppm
Chlorine	8 ppm	< 1 ppm
