Miller® ShockFusion™ / Fusion™ Small Standing Seam Design Base Plates and Mounting Assemblies

- The small base standing seam supports spacing from 11.75 inches (298 mm) to 17 inches (432 mm) and includes a post with a base and clamping assembly kit
- Designed for straightforward configurations, these kits are rated for one to four users
- Versatile single-point anchor adapts to standing seam, membrane, built-up, metal sheathing, concrete, and wood designs
- Attaches to existing roof surfaces for quick, cost-effective installation, reducing labor and eliminating the need for roof penetration
- In the event of a fall, the top of the anchor post realigns with the force, activating the patent-pending energy absorber, which significantly reduces fall forces
- Durable stainless steel components and zinc-plated steel with powder coating ensure resilience against outdoor conditions
